Requirements:
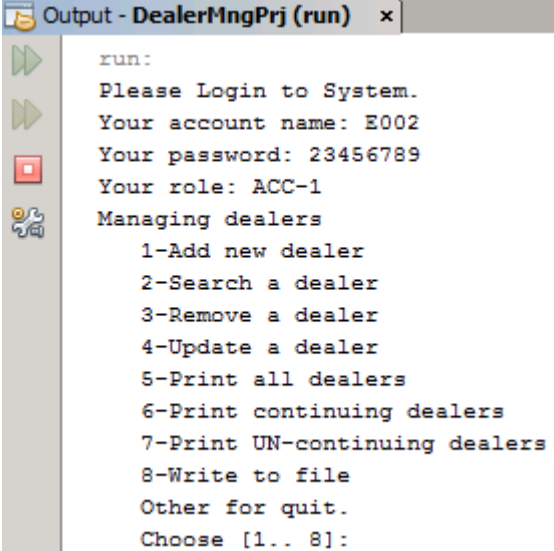

A firm ABC needs a console program to manage their resources including dealers & delivery notes with the following features:

- Provide basic operations (CRUD - Create, Read, Update, Delete) on dealers & delivery notes.

- Support a basic authorization, only users with specified roles can operate on specific resources, following roles are supported:

> - R001: Allowed to work with dealers
> - R002: Allowed to work with delivery notes
> - ADMIN: Allowed to manage users (Create, Read, Update, Delete)

- Initial data of users, dealers, deliveries will be provided through a "config.properties" file:

> users_file=users.csv
>
> dealers_file=dealers.csv
>
> deliveries_file=deliveries.csv

- After user log in with a role R001, displace following options:

```
Output - DealerMngPrj (run)  ×

run:
Please Login to System.
Your account name: E002
Your password: 23456789
Your role: ACC-1
